

Shave treatment area prior to applying numbing cream.

DO NOT apply to face (Please ask for a separate topical for the face).

Stir numbing cream prior to application. Apply thin layer to sensitive treatment area(s) 2 ½ to 3 hours prior to your session. (You should be able to see a "wet coating" to your skin. This tells you enough has been applied).

Do not get this medicine in your eyes, nose, or ears. If it does get on these areas, rinse it off right away. This is for external use only.

Let absorb and dry as much as possible prior to covering with clothing. Do NOT cover with saran wrap or any tight fitting clothing.

Wash your hands with soap and water before and after using this medicine.

Do not apply to an area larger than your full legs and bikini for women or no more than the entire back for men.

It is possible the numbing cream may cause skin irritation, redness and swelling which should go away a few hours after your session.

This numbing cream contains multiple numbing agents, including but not limited to ibuprofen. Do not use this medicine if you have had an allergic reaction to any numbing agent in the past, such as lidocaine or benzocaine. This supply is intended to last through your treatment package. If you have any questions or concerns, please call our office at (404)-832-0300.
